Via Cavallera, 6/A
I-25045 Castegnato (Bs)

And

Wieland-Werke AG
Graf-Arco-Strasse 36
D-89079 Ulm

According their mutual collaboration the above-mentioned companies confirm the compatibility of the following products in order to realise a traditional pipe system.

TIEMME: brass press-fittings and brass valves with press-fitting connection series 1650

WIELAND: flexible copper pipe with white coating called "Wieland cuprotherm CTX"

According their collaboration the above-mentioned companies undertake to inquire each other in case of relevant changes of components of this system.

The partners allow the mutual possibility to use marks or name of products in order to issue commercial documents which have to be seen and approved from the both companies before their publication.

On documentation and specification should be mentioned that copper flexible pipe must be deburred by Tiemme deburring tool art. 1498 before to get fitted in press-fitting.
